Abstract. The abstract should briefly summarize the contents of the paper in 150–250 words.

Keywords: ÖPNV · Überwachung · Datenschutz.

Table of Contents

1 Einsatzgebiet

2 Rechtliche Rahmenbedingungen

3 Grobarchitektur

Subsequent paragraphs, however, are indented. Test der live-Funktion

Fig. 1. Ich aktuell

Sample Heading (Third Level) Only two levels of headings should be numbered. Lower level headings remain unnumbered; they are formatted as run-in headings.

Sample Heading (Fourth Level) The contribution should contain no more than four levels of headings. Table 1 gives a summary of all heading levels.

Table 1. Table captions should be placed above the tables.

Heading level	Example	Font size and style
Title (centered)	**Lecture Notes**	14 point, bold
2nd-level heading	**2.1 Printing Area**	10 point, bold
3rd-level heading	**Run-in Heading in Bold.** Text follows	10 point, bold
4th-level heading	*Lowest Level Heading.* Text follows	10 point, italic

4   Nummer 2

Displayed equations are centered and set on a separate line.

$$x + y = z \tag{1}$$

Please try to avoid rasterized images for line-art diagrams and schemas. Whenever possible, use vector graphics instead (see Fig. 2).

Fig. 2. A figure caption is always placed below the illustration. Please note that short captions are centered, while long ones are justified by the macro package automatically. Vorher war hier eine eps DAtei

Theorem 1. *This is a sample theorem. The run-in heading is set in bold, while the following text appears in italics. Definitions, lemmas, propositions, and corollaries are styled the same way.*

Proof. Proofs, examples, and remarks have the initial word in italics, while the following text appears in normal font.

For citations of references, we prefer the use of square brackets and consecutive numbers. Citations using labels or the author/year convention are also acceptable. The following bibliography provides a sample reference list with entries for journal [2], [1,3].

5 Security

5.1 Risikoidentifizierung

5.2 Konkretes Szenario

5.3 Maßnahmen

6   Privacy

6.1   Risikoidentifizierung

6.2   Konkretes Szenario

6.3   Maßnahmen

7 Fazit
